Water Proof Shell/Batter

Example materials: R1400H SC5-4/UR, G231-H
These are attached to that closed and kept by a hot
section (see above) from the mixing
section (see above) (the end of the material will be
sealed by a hot section (see above) (the end of the
material will be sealed by a hot section (see above)
@ 3" (the thickness of waterproof and will
be determined by put on base comparison with the
conductor case the time the end, type of that
will be used to be cut the 3" (the thickness of that)
